

## **Pulmonary hypertension and pulmonary vascular disease**

28-30 June 2012 – Lausanne, Switzerland

We would like to inform you that registration is now open for the ERS school course on Pulmonary hypertension and pulmonary vascular disease. During this course diagnostic techniques and new treatment modalities will be discussed, so that participants will feel competent to manage patients in association with their Pulmonary Hypertension Centre. **Bursaries are available for this course.**

By the end of the course, participants will be able to:

- ▶ Understand the diagnostic processes leading to a diagnosis of pulmonary hypertension/embolism and be able to initiate appropriate investigations
- ▶ Understand the pathogenesis of the condition
- ▶ Understand the basis behind modern treatment of pulmonary hypertension and pulmonary thromboembolism

The course will include plenary sessions of lectures with question and answer sessions as well as discussions periods.

Kind regards,

**Sarah Dowsland**
