

Toraks Cerrahisi Bülteni

Bulletin of Thoracic Surgery

PREFACE

Doç. Dr. Ş. Tuba Liman
Editor of TTD Bulletin of Thoracic Surgery

Prof. Dr. Ayten Kayı Cangır
Editor of TTD Bulletin of Thoracic Surgery

Dear Readers

We are proud to present the September 2012 issue of the Thoracic Surgery Bulletin, gathering your attention and interest since the first publication in January 2010. We aimed to present you different subjects in each issue. By the September 2012 issue we have some surprises for you. Positively responding to our request, The Belgian Thoracic Surgeon who is well known with his studies on Lung Cancer, Prof. Dr. Paul Van Schil accepted to be the guest editor of this issue, chose the subjects and writers. Prof. Dr. Paul Van Schil pointed the theme of this issue as "What is new in Lung Cancer". The issue covers the progression, improvements and novelties on the curing of Lung Cancer.

The participating writers are all well experienced in their fields and they composed an important and a useful source for our colleagues, thoracic surgeons and chest physicians dealing with lung cancer.

We thank all the writers and mainly Prof. Dr. Paul Van Schil who accepted to participate in this issue as per our request. We also thank our colleagues who contributed their efforts and knowledge and meticulously translated the texts. You may found all the articles of this issue in Turkish and in English at <http://www.toraks.org.tr/book.aspx?book=6&menu=64>.

We are grateful to Turkish Thoracic Society Executive Committee for this issue to be bilingual and all the staff who has efforts in this issue from the beginning since it is published.

We hope you will benefit from this work.

Wishing you all the best.
